Enlist Cotton	Regrowth After Mowing	2.0 – 3.0 oz/A	1.0 lb ai of Dicamba Acid

DIRECTION FOR USE:

- Apply tank-mix of Reviton + Dicamba to Enlist cotton regrowth after stalk mowing.
- Apply to regrowth when it reaches 3 – 4 inches tall.
- **Always** include a high-quality MSO at 1 pt/A.
- Ground application only in a minimum of 15 GPA.

RESTRICTIONS:

- Two applications may be needed for effective control at a two to three-week interval.
- Do not apply Reviton at a rate greater than 3 fl oz per acre. Do not exceed 9 fl oz per acre per year.

A tank-mix of Reviton + Dicamba + an MSO adjuvant will effectively control Enlist cotton regrowth after stalk cutting. Thus, for best control a two-application program is recommended for most effective control.
