Fast and effective broad spectrum insect control

Kendo® is an advanced third-generation pyrethroid with contact and ingestion activity that controls a wide spectrum of yield-robbing pests on more than 100 different crops.

A highly versatile and economical insecticide weapon, Kendo’s best-in-class formulation provides fast and effective knockdown plus proactive resistance management to halt crop damage caused by sucking and chewing insects.

Product Specifications

- **Brand Name**: Kendo®
- **Category**: Insecticide
- **Active Ingredient**: Lambda-cyhalothrin
- **Crops**: Row crops, stone fruit, tree nuts, vegetable crops
- **Site of Action**: Group 3A
- **Formulation**: Emulsifiable concentrate
- **AI/Gallon**: Lambda-cyhalothrin 1 lb a.i./g
- **Applications**: In-furrow / Surface-applied (planting) / Foliar
- **Rates**:
  - Soil-applied: 0.66 fl oz/A¹ (See label for rates by crop)
  - Foliar: 1.92 - 3.84 fl oz/A (See label for rates by crop)
- **Signal Word**: Warning

¹Kendo: Soil-applied rates @ per 1,000 feet of row

Performance Benefits

- EC formulation with best-in-class performance.
- Protects crops against more than 200 insect species.
- Labeled for at-plant and foliar sprays on most crops.
- Multi-crop flexibility with broad tank mix compatibility.

Innovative Value

With a relatively low application rate and a top-performing formulation, Kendo is one of the most competitive and cost-effective pyrethroids on the market today.
